  - ➢ Node.js
  - ➢ mySQL
- ❖ Programming
  - ➢ Java
  - ➢ Python
  - ➢ SQL
    - ■ Oracle SQL
    - ■ Microsoft SQL Server

EMPLOYMENT HISTORY

Financial Analyst: FLEETCOR, Brentwood TN   Aug 2018-Jan 2020
- Restructuring reporting for the compliance line of business and increasing visibility to the finance team and president of the company in order to optimize pricing strategies.
- Spearheaded a rate initiative that increased overall revenue of fuel tax service by 8%.
- Provided all the weekly and monthly financial reports for the compliance business. Also provided ad hoc requests including, but not limited to, isolating at-risk customers in our permits services, monthly forecasts of our fuel tax business and calculating the revenue and volume impact of promotions done by our marketing team.
- Assisted in the daily, weekly and monthly financial reports for the fuel card business, including a summary of our large fleet customers by account managers and a quarterly presentation for one of our largest clients.
- Improving the efficiency and detail of reporting by creating dashboards and replicating the Business Objects reports in Oracle SQL Developer.
- Increased the number of monthly reports by 50% while dropping the completion time more than threefold. Used Alteryx to automate reports and made them user-friendly for non-SQL adept colleagues.
- Creating ad hoc reports in Business Objects and Oracle at the request of Permits supervisors.
- Responsible for forecasting the transactions for the 2020 budget in the Permits business.

Teacher: C2 Education, Houston TX   Jun 2018-Aug 2018
- Instructed students in classes with a 3-to-1 student-teacher ratio.
- Kept detailed records of tutoring sessions using C2 Student Progress Records.
- Tracked and analyzed student progress.
- Prepared lessons to meet student needs.
- Worked closely with the Center Program Director to meet students' academic goals.

Research Assistant: Stanford University, Stanford CA   Jun 2016-Nov 2016
- Collected data from CalPERS, CalSTRS and various independent pension system financial reports and maintained in SQL Server database.
- Looked at employee compensation, benefits, retiree age and status, employer contributions to calculate market and actuarial pension debt in cities in Santa Clara county.
